## Hume Coal in 2015

### Apprenticeship Program Update

"After my recent visit to Kristine's workplace, I have been advised that she is progressing above par in her traineeship. Kristine is able to use initiative, listens and takes advice, is always aware, is sensible and caring, and is keen to learn (to name a few things). Kristine was given the highest rating from her workplace supervisor, and I am very proud to have her employed via 1300apprentice. Kristine is an asset not only to the workplace, but to everyone involved in her journey. This opportunity (that has been provided thanks to Hume Coal's sponsorship, and the Child Care Centre's support) is such an asset to not only Kristine, but also to the child care industry.

Thanks to everyone involved – Meagan Thorpe 1300apprentice "

Kirstine Hollis

### Hume Coal Community Office

Shop 7, 256 Argyle Street, Moss Vale  
Ph: 02 4868 1233  
E: [info@humecoal.com.au](mailto:info@humecoal.com.au)

### Community Office

The Hume Coal Project Community Office is located at Old Argyle Square, at the corner of Argyle and Valetta Streets in Moss Vale.

Our office is open Tuesday, Wednesday and Thursday for the public to drop in and find out more information on the project in an accessible location.

The Community Liaison Team will be available to answer questions as well as provide factsheets, newsletters and information about the Project such as exploration, drilling and environment.

We really value listening to our local community regarding their views and questions about the project, so why not pop into the community office and have a chat with the team.

If you can't make it to the community office you can find out more at [www.humecoal.com.au](http://www.humecoal.com.au)

### Fast Facts

We are focused on creating a sustainable mining operation –using best practice techniques and pride ourselves on being different and better in all aspects of our work.

Our coal mining operation will create more than 300 local long-term jobs and a condition of employment will be that workers live in the local area.

We take very seriously our responsibility to ensuring there is minimal impact on water supplies in the region and our mine design will reflect this, and we anticipate releasing the mine plan around July 2015.

We are currently investing approximately \$13 million in the local economy every year.

We think it's important that people have all available information on the project so they can make up their own minds.

We will continue to update residents on key operational milestones through our bulletins and our website.

We take very seriously our responsibility to ensuring there is minimal impact on water supplies in the region.
