Hume Coal in 2015

Presentation to Moss Vale Rotary Club

This month, staff from the Hume Coal Project gave a presentation to the Moss Vale Rotary Club. The team presented an update on the Project, the methods of planning an underground coal mine, as well as outlining our environmental management and the Hume Coal community consultation programs that the Project has in place.

There were also some interesting discussions during the question and answer session after the presentation. These presentations and discussions are an important part of our community consultation program, as they help to ensure a better understanding and incorporating where possible, those issues that are of importance to the community when planning our proposal.

If your club or organisation would like to enquire about a presentation from the Hume Coal Project, please contact the Community Liaison team by emailing info@humecoal.com.au. The team can also be reached at **4869 8200**, or by visiting the Community Office on the corner of Argyle and Valetta Streets in Moss Vale.

Community Shop

The Hume Coal Project Community Office is located at Old Argyle Square, at the corner of Argyle and Valetta Streets in Moss Vale.

Our office is open Monday to Friday, between 10am- 2pm, for anyone to drop in and find out more information on the Project.

The Community Liaison Team will be available to answer questions as well as provide factsheets, newsletters and information about the Project such as exploration, drilling and environment.

Water Advisory Group (WAG) Meeting

The first Water Advisory Group (WAG) meeting for 2015 was held this month.

The NSW Land and Water Commissioner, Jock Laurie, along with Mitchell Isaacs, from the NSW Office of Water, and Vanessa O'Keefe, a consultant with the NSW Office of Water, kindly attended and presented an overview of the Groundwater Baseline Project. This Project is being undertaken across NSW by the Office of Water and ensures all stakeholders have access to the baseline information regarding the regions groundwater resources.

For more information about the Hume Coal Project Water Advisory Group, please visit www.humecoal.com.au, or by contacting the team on **02 4869 8200**.

Fast Facts

We are taking an environmentally responsible approach to coal exploration in the Southern Highlands.

We are focused on creating a sustainable mining operation –using best practice techniques and pride ourselves on being different and better in all aspects of our work.

We will continue to update residents on key operational milestones through our bulletins and our website.

We're conscious of the role we play in the local community and we're here to make a positive social and economic contribution.

We think it's important that people have all available information on the project so they can make up their own minds.

We take very seriously our responsibility to ensuring there is minimal impact on water supplies in the region.
