

# COMMUNITY

## BULLETIN

We'd like to provide you with an update from the month of November ...

### Employment Info Day

**During the month of November, Hume Coal held an information day at Mereworth for members of the community who had expressed support for the project and a strong interest in future employment opportunities.**

Since launching our new website in March 2016, Hume Coal has been contacted by over 200 people interested in future jobs and employment opportunities.

The day was a huge success with many community members attending to discuss the project and

learn more about the types of roles which may be available. A range of community members attended, from experienced underground miners, tradespeople, environmental scientists and people new to the industry. All were very interested to work and live in their local area. The attendees expressed their support for the Project and the sustainable mine design.

If you'd like to know more about the types of jobs available and express your interest in future employment, register your details at [www.humecoal.com.au](http://www.humecoal.com.au)

At the start of the November two handsome and clean shaven members of the Hume Coal team – Ben and Josh – decided to dress up their top lip and raise money for Movember.

The Movember Foundation is the leading global organisation committed to changing the face of men's health. This work is saving and improving the lives of men affected by prostate cancer, testicular cancer and mental health problems.

This year the boys supported the cause to encourage their mates and colleagues to step out of their comfort zone and take charge of their health. "With the mining industry heavily dominated by men, it's important that we encourage and support each other to take charge of what's really important – ourselves and our family"

Ben and Josh managed to raise over \$560 in donations. Well done guys!

### Approvals Process Update

The Environmental Impact Statement (EIS) will be lodged shortly with the NSW Government and, subject to any further government requirements, be available for public exhibition in early 2017.
