

HUME COAL SCHOLARSHIPS

Hume Coal was proud to award three scholarships, to the value of \$7000 each, to three outstanding students currently undertaking tertiary study at the University of Wollongong.

One of the recipients, Jade, in her final year of a Bachelor of Commerce had the following to say:

“The opportunity Hume Coal has provided to not only myself but to other local students in the Southern Highlands has provided endless opportunities for myself and other regional students to excel in our tertiary qualifications.

This scholarship will not only provide financial support, but will be my biggest motivation to finishing my degree, as I head into my final year at UOW. This scholarship will contribute towards my further study once I graduate, allowing me to commence my post graduate qualification to become a Chartered Accountant. I would like to extend my sincere thanks to Hume Coal for providing me with this wonderful opportunity.”

If you, or anyone your know, may be interested in scholarships for 2018, look out for updates at www.uow.edu.au/about/scholarships.

STUDENT VISITS

Hume Coal hosted a group of year 5 students at Mereworth in October. The students came to learn about what the Hume Coal project meant for our region, the type of mining processes and equipment, how we'd undertaken our environmental investigations, and how Hume Coal would ensure sustainability throughout the project's design, construction and operation.

After some thorough questions from the students, we had a short tour of the surface and underground 3D models and examined the landscape of the proposed infrastructure.

It was a really great opportunity to communicate with this group and we encourage all members of this community to get in touch to learn more about the Hume Coal project.

SPRINGTIME

Its spring and our landscapers are working overtime to keep the lawns trimmed and the garden looking spectacular. As most would be aware, it was a fairly dry winter in 2017, but our landscapers have done a great job. But the hard work does not stop, they are now prepping for what is shaping up to be a warm summer.
